

ESPACOMP Pre-Conference Workshop Proposal

Workshop Title: Writing Effective Specific Aims and Objectives for Dissemination and Implementation Science

Workshop Faculty: [Sabina De Geest](#), [Liset van Dijk](#), Bart van den Bemt, [Leah Zullig](#), [Benien Vingerhoed-van Aken](#), [Enola Proctor](#)

Workshop Topics:

The workshop will consist of several brief lectures on the following topics:

- Implementation science funding mechanisms
- Funder's perspective on implementation science from the Netherlands
- A U.S.-based implementation scientist's perspective on grant writing
- Experiences with the grant review process

Workshop Format: The proposed workshop would be comprised primarily of small group work, with a few brief lectures, and ample time for small- and large-group discussion. We would propose to allow up to 20 participants. This will allow us to divide the large group into 6 smaller groups of approximately 3 participants each. This will enable opportunities for detailed group discussions.

Participants must bring a working version or idea of a specific aims page or proposal. This should be submitted at the time of course registration. This document will be iteratively modified and improved through small group work and informal presentations during the full-day workshop.
